

# BD- Vaccination Vouchers may ONLY be redeemed for a Janssen® (J&J) vaccine

22 November  
2021

They may not be used to obtain a booster of Comirnaty® (Pfizer) vaccine. This is an off-label and unapproved use of a vaccine on the basis of current insufficient safety and efficacy information.

**Consequences of obtaining a Pfizer dose using a BD-voucher as part of Sisonke include:**

- 1** No safety support in the event of severe adverse reactions
- 2** No updating of your Vaccination Record impacting your Vaccine Passport
- 3** Reporting to SAHPRA as a protocol violation

Please note that Sisonke Vaccination Site Staff **CANNOT** administer Pfizer doses to Sisonke participants presenting with a BD-voucher.

Sisonke views any pressure from participants to force or “trick” staff into administering Pfizer doses as extremely serious and cases will be reported to Research Ethics Committees, SAHPRA and Provincial authorities.
